Art Unit: 1614

Claims 13-26 are presented for examination.

The response to the restriction requirement March 25, 2003 has been received and entered.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 13-25 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The claimed invention is directed to the use of "a neuroprotectant compound effective to protect the plurality of ocular neurons from cell death". The specification discloses examples of structures of some compounds within the scope of what is claimed. However, there is no evidence that there is any *per se* structure/function relationship between the disclosed neuroprotectant compounds and any others that might be found using the claimed method. Structural identifying characteristics of group of neuroprotectant compounds are not disclosed. Therefore, the claimed invention is not supported by an adequate written description.
